**The Practice of Emergency and Critical Care Neurology** Eelco F.M. Wijdicks,2016-04-11 Fully updated and revised, the second edition of *The Practice of Emergency and Critical Care Neurology* puts a more modern approach on the practice of emergency neurological care. When most texts within the field focus on the theoretical aspects, this book concentrates on the management of neurologic conditions, recognition of deterioration of neurologic functions, neurosurgical procedures, and immediate interventions. This text also presents hard data to explain why we do what we do. Dr. Wijdicks condenses essential information into several sections comprising of the principles in recognizing critically ill neurologic patients in the emergency department, the evaluation of symptoms indicating critical emergency, general principles of managing critically ill patients, monitoring devices and diagnostic tests, complete management of specific disorders in the neurosciences intensive care unit, postoperative neurosurgical and neurointerventional complications, management of medical complications, and end of life care. Key Features of the New Edition include 1. Additional chapters on critical consults in surgical and medical ICUs, critical care management, and comprehensive monitoring and biomarkers to reflect new research; 2. Rich illustrations using color photos of patients and drawings of important basic concepts of mechanism of acute neurologic disease; 3. Fully updated and comprehensive reference list; 4. A pocket book of selected tables and figures covering all essential points for quick reference and as a survival guide for house staff. This is the go-to guide for every physician, staff neurologist, neurointensivist, resident, and fellow in training with managing acutely ill neurologic patients.

**The Practice of Emergency and Critical Care Neurology** Eelco F. M. Wijdicks, MD, PhD, FACP,2010-06-22 *The Practice of Emergency and Critical Care Neurology* serves as the definitive authoritative reference on the care of the patient with a critical neurologic disorder at risk of deterioration and in need of immediate attention. This work is an expanded new edition of the book on the management of patients with critical neurologic disorders. This single-authored monograph is

broad in scope and follows the patients from the very moment they enter the emergency department to their care in the neurosciences intensive care unit. This book condenses the essential information into several sections. These are: The General Principles of Recognition of Critically Ill Neurologic Patients in the Emergency Department, The Evaluation of Presenting Symptoms Indicating Urgency and Critical Emergency, General Principles of Management of Critically Ill Patients, Monitoring Devices and Diagnostic Tests, Complete Management of Specific Disorders in the Neurosciences Intensive Care Unit, Postoperative Neurosurgical and Neurointerventional Complications, Management of Medical Complications and End of Life Care. This accessibly written book differs from the conventional by specifically following the time course of clinical complexities as they emerge and change. It offers advice on how to diagnose and manage acute neuromuscular respiratory failure, acute worrisome headache, acute febrile confusion, acute diplopia, acute movement disorders, acute paraplegia, seizures and coma of uncertain cause in the emergency department. The major disorders requiring neurocritical care are covered in great detail and include traumatic brain injury aneurysmal subarachnoid hemorrhage, cerebral hemorrhage, hemispheric ischemic stroke, basilar artery occlusion, acute bacterial meningitis and encephalitis, myasthenic crisis and severe Guillan Barre syndrome. This book comes with a pocket book of selected tables and figures. This booklet covers all essential points for quick reference and has been considered a 'survival guide' for the house staff.

Discourse and International Relations Dagmar Scheu, José Saura, 2007 This book assembles a selection of essays on Discourse and Intercultural Relations presented at Murcia University in September 2004. After the recent outburst of the East-West conflict intercultural relations and the challenges embedded in intercultural communication are of increasing importance. This compilation unravels these topics from the point of view of Discourse Analysis and Cultural Studies. The main aim is to highlight the discursive strategies employed by the dominant political elite in a variety of contexts to maintain and reinforce their power position in intercultural encounters. The paramount concern is, therefore, to reflect upon the

interrelations between language, power and discourse (in the Foucaultian sense). Within a broad theoretical framework, the contributions are divided into two main parts. Part I includes papers which work within the field of Critical Discourse Studies and explore ideological issues, such as the concept of 'otherness', identity, race and the mass media's manipulation of public opinion. Part II adopts a more culturally based stance covering topics, such as intercultural competence, hybridity, intercultural education etc. -- Publisher's Description.

*Christians in the Twenty-First Century* George D. Chryssides, Margaret Z. Wilkins, 2014-09-11 'Christians in the Twenty-First Century' examines Christianity as it is understood and practised both by active followers and those who regard themselves as Christian. The book opens with an examination of key Christian concepts - the Bible, the Creeds, the Church and the sacraments - and the major traditions of Roman Catholicism, Eastern Orthodoxy and Protestantism as well as more recent movements. The book continues with an analysis of the challenges presented by the rise of science, new approaches to biblical scholarship, the rise of fundamentalist movements, the ordination of women, secularization, the interfaith movement, and the impact of the electronic revolution.

*Legal Knowledge and Information Systems* Arno R. Lodder, Laurens Mommers, 2007 This book includes papers from the twentieth JURIX conference (first organized in 1988). Over the years JURIX has become more and more international. JURIX is originally a Dutch/Belgian initiative. Nowadays, the conference papers are in majority from non-Dutch authors, and since 2002 JURIX is held outside the Netherlands and Belgium every other year. Most accepted papers can largely be fitted into either work on argumentation or work on ontology. Argumentation has been a JURIX-topic during all past years, and the interest in ontology has revived recently with Semantic Web initiatives. The topic.

**Aesthetics in Digital Photography** Henri Maître, 2023-08-15 Automatically evaluating the aesthetic qualities of a photograph is a current challenge for artificial intelligence technologies, yet it is also an opportunity to open up new economic and social possibilities. *Aesthetics in Digital Photography* presents theories developed over the last 25 centuries by philosophers and art critics, who have sometimes been governed by the objectivity of perception, and other times, of course, by the subjectivity of human judgement. It explores the advances that have been made in neuro-aesthetics and their current limitations. In the field of photography, this book puts aesthetic hypotheses up against experimental verification, and then critically examines attempts to "scientifically" measure this beauty. Special attention is paid to artificial intelligence techniques, taking advantage of machine learning methods and large databases.

**Sustainability and the Political Economy of Welfare** Max Koch,Oksana Mont,2016-04-28 Welfare is commonly conceptualized in socio-economic terms of equity, highlighting distributive issues within growing economies. While GDP,

income growth and rising material standards of living are normally not questioned as priorities in welfare theories and policy making, there is growing evidence that Western welfare standards are not generalizable to the rest of the planet if environmental concerns, such as resource depletion or climate change, are considered. Sustainability and the Political Economy of Welfare raises the issue of what is required to make welfare societies ecologically sustainable. Consisting of three parts, this book regards the current financial, economic and political crisis in welfare state institutions and addresses methodological, theoretical and wider conceptual issues in integrating sustainability. Furthermore, this text is concerned with the main institutional obstacles to the achievement of sustainable welfare and wellbeing, and how these may feasibly be overcome. How can researchers assist policymakers in promoting synergy between economic, social and environmental policies conducive to globally sustainable welfare systems? Co-authored by a variety of cross-disciplinary contributors, a diversity of research perspectives and methods is reflected in a unique mixture of conceptual chapters, historical analysis of different societal sectors, and case studies of several EU countries, China and the US. This book is well suited for those who are interested in and study welfare, ecological economics and political economy.

**20th ISPE International Conference on Concurrent Engineering** C. Bil, J. Mo, J. Stjepandić, 2013-09-12 As a concept, Concurrent Engineering (CE) initiates processes with the goal of improving product quality, production efficiency and overall customer satisfaction. Services are becoming increasingly important to the economy, with more than 60% of the GDP in Japan, the USA, Germany and Russia deriving from service-based activities. The definition of a product has evolved from the manufacturing and supplying of goods only, to providing goods with added value, to eventually promoting a complete service business solution, with support from introduction into service and from operations to decommissioning. This book presents the proceedings of the 20th ISPE International Conference on Concurrent Engineering, held in Melbourne, Australia, in September 2013. The conference had as its theme Product and Service Engineering in a Dynamic World, and the papers explore research results, new concepts and insights covering a number of topics, including service engineering, cloud computing and digital manufacturing, knowledge-based engineering and sustainability in concurrent engineering.
